What we do in our Holistic Center

- We are working simultaneously on several levels of human beings:
- **Information level**: Timewaver®Med: quantum teleportation, a) diagnosis and b) distant therapy; both via the cosmic information field
- **Energy level**: Timewaver®Frequency: electric current frequencies application from hand to hand (the right ones are detected via the cosmic information field)
- **Biochemical level**: a) nutraceuticals the body needs (after he was asked for); b) enzyme therapy acc. to Pasquale Ferorelli (Citozeatec)

The cosmic information field

- The assertion is: all what happens on earth is stored in the cosmic information field. This means earlier incarnations, the presence, and the next future. Info field concerning our earth: Akasha chronicle.
- It contains: all acts, spoken words, thoughts, emotions, the background motivations, the subconsciousness, the Karma, everything. Nothing remains unknown or unstored. We all have a cosmic «twin».
- The problem is how to contact this field, and how to receive correct information.
- This is performed by the correlation of two methods: a) transfer of digitalized info via a Kozyrev mirror, b) registration of the deviation of a frequency distribution of photons from the Gaussian coincidence (= «no»).

No energy, no information is lost, forever

- Christians call the cosmic information field the Diary of God.
- It is a holographic quantum computer with unlimited capacity.
- It is supervised by spiritual entities ("angels") who stop activities that do not comply with Divine Laws.
- Accordingly, egocentric questions (what are the right lottery numbers?) are not answered correctly.
- Likewise, expectations or doubts on the part of the therapist or the patient have a counterproductive effect. The best possible neutrality is required.

The TimeWaver[®]- device

- Quantum diagnostics is independent from space and time. The communication is no transmission, but a quantum teleportation.
- So, earlier incarnations and their karma-load can be detected.
- Views into the future are possible.
- However, only timelines can be recognised. Since these do not contain any determinations, they are possibilities but not facts.
- The human being in his free will decides which of the timelines will become a reality, together with the time quality. However, if he gets to know a possibly dangerous timeline, he can steer against it, change his thinking and behavior and does not have to experience it.

The transfer is performed by water

- Our body water is in a plasma state, similar to glacier and arctic and antarctic water.
- According to Pollack it is the 4. state of water, the Exclusion Zone (EZ) water, with hexagonal shape. This water is capable to act as receiver and transmitter, and to store information.
- Water very effectively transmits frequencies and information and stores them like a memory, e.g. the frequency signature of DNA. Water is the link that allows the immaterial information field to make contact with matter.
- Water has unique capabilities thanks to its dipolar molecular properties. These special properties were described by the findings of international researchers such as Prof. Giuseppe Vitiello or Nobel Prize winner Luc Montagnier.

Hydrogen, H₂ minus

- Instead of H⁺ it has an overload of one electron. Hence, it is strongest in terms of its power to neutralize free radicals. When taken orally or by inhalation simultaneously, it can save any distressed part of the body being on risk to produce cancer cells.
- Hydrogen is the smallest element. This allows it to diffuse very freely, allowing the free-radical fighting hydrogen molecules to get places most other antioxidants cannot. Hydrogen can cross the blood-brain barrier and cell membranes, penetrating deep into a cell's nucleus and mitochondria.
- Cell Signaling - Much of hydrogen's benefits come from its cell signaling activity. Within a cell, hydrogen works at the genetic level by "turning on" the genes that code for our natural antioxidant defense systems. H₂ tells the cells to start pumping out more of your natural antioxidants, like glutathione peroxidase (GSH) and superoxide dismutase (SOD).
- H₂ helps protect us from the cellular damage caused by the oxidative stress from increasing radiation, chemical and metals exposure.

Energy and information

- We do not prefer to live on calories. These are a low vibrational form of energy.
- We live on high vibrational energy and high vibrational information.
- These are excited electrons and photons. The life of the living beings on earth is a struggle for excited electrons and photons.
- If we are in love, for example, we hardly need any calories, because love is the highest form of energy and information.

Pollack Laboratory

“Uncovering nature's deeply held secrets”

Gerald H. Pollack: “The Fourth Phase of Water - Beyond Solid, Liquid, and Vapor”

- “This book provides evidence for a fourth phase of water. This phase occurs mainly next to water-loving (hydrophilic) surfaces. It is surprisingly extensive, projecting out from the surface by up to millions of molecular layers.
- Of significance is the observation that this fourth phase is charged; and, the water just beyond is oppositely charged, creating a battery that can produce electrical current. Light charges this battery. Thus, water can receive and process energy drawn from the environment in much the same way as plants. Absorbed light energy can then be exploited for performing work, including electrical and mechanical work, as well as the work of proteins (e.g. enzymes) inside cells.”
- And: water can receive and process frequency information patterns, via quantum teleportation. The patterns can control, regulate and process via negative feedback loops.

Masaru Emoto

Wikipedia: “The Hidden Messages in Water is a 2005 New York Times Bestseller book, written by Masaru Emoto advancing the pseudoscientific idea that the molecular structure of water is changed by the presence of human consciousness nearby, backed by "exhaustive and wildly unscientific research" claiming to back this conjecture.”

My comment: the problem is an insufficient reproducibility. The higher the sensitivity of a method, the lower the reproducibility. Every doubt or negative thought disturbs the result. It is not pseudo-science but para-science.

Burkhard Heim's Cosmology

$x_1 - x_3$ = Die dreidimensionale Welt
($x_1 = X$, $x_2 = Y$, $x_3 = Z$)

$x_4 = t$ = Die Zeit

$x_1 - x_6$ = Die materielle Seite der Welt
($x_5 = \text{Entelechia}$, $x_6 = \text{Äon}$)

$x_7 - x_{12}$ = Die nichtmaterielle Seite der Welt

Heim describes 12 cosmic levels, X1 to X12

- First of all, Heim distinguishes between three real, measurable (height, width, depth) and three imaginary, imaginable (time, entelechy, aeon) coordinates. The common space-time model, i.e. the four-dimensional view of the world, is extended by two dimensions:
- - the dimension X5 (entelechy, principle of formation), which values the states of organisation that are apparently constantly updating themselves in X4 (time), and
- - the dimension X6 (aeon, world-age), which controls the ambiguous actualization direction in X4. Thereby, X6 can only actualising control entelechal structures during the world-age (aeon).
- Accordingly, a distinction is made between latent and manifest events. This is something completely new. Quantum physical events that were previously interpreted as "coincidence" are in the light of the new coordinates by no means random at all, but rather conditioned by certain activities in X5, X6.
- X7 to X12 are non-material (X7: energy, X8: information, X9: consciousness, X10 - 12: God`s Logos).

Realm of Time Consciousness (the third continuum or "Z" axis)

This continuum represents the person's sense of historical time. It consists of one or more events, each of which is a series of **Single Moments**.

Using the Realm of Time Consciousness

we can see our previously unrecognized ability to consciously experience more than one event at a time, such as when we consciously experience the present while **simultaneously** experiencing a past event.

More important, it is this ability, (the ability to be in two or more states of consciousness simultaneously), which is the essence of healing.

Biophysics and biochemistry

- Biophysics is superordinate to biochemistry. However, biochemistry also works autonomously. It has its own epigenetically stored consciousness field.
- So, the intracellular enzymes control the DNA/RNA automatically, and they repair chromosomal breaks and problems routinely.
- Those enzymes are a suitable possibility to normalize genetic abnormalities and diseases.
- We have treated several patients with genetic diseases (e.g. Morbus Stargardt) by using enzyme protocols (given by Mr. Pasquale Ferorelli). The progression of the diseases was stopped in all cases, and in some cases there were clear improvements.

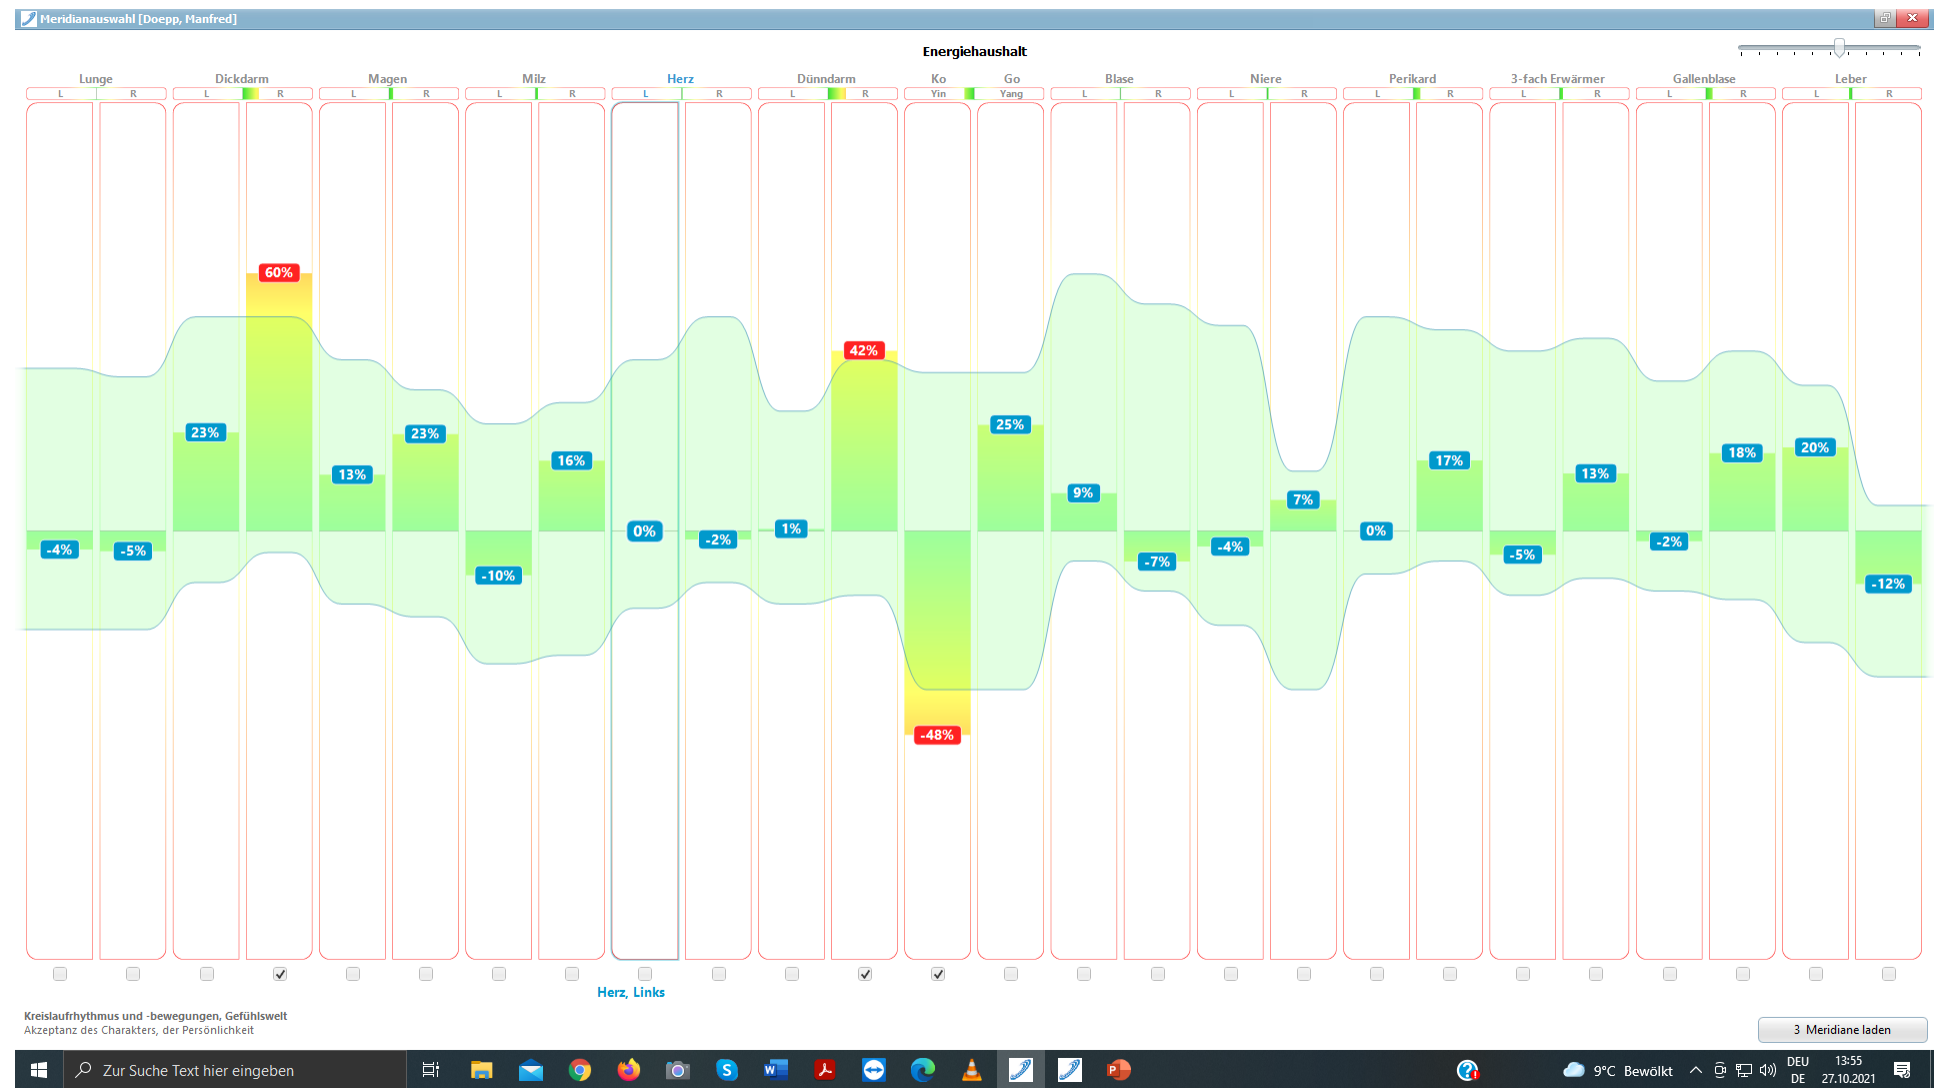

Tests

- We perform a testing of remedies by means of several methods.
 - - Meridian diagnostics
 - - Aura diagnostics
 - - Heart Rate Variability (HRV)
- The question is, if the autonomous systems of the wholeness of the human being react with an improvement or a deterioration of the results.
- We tested some kinds of enzyme products of www.citozeatec.ch .

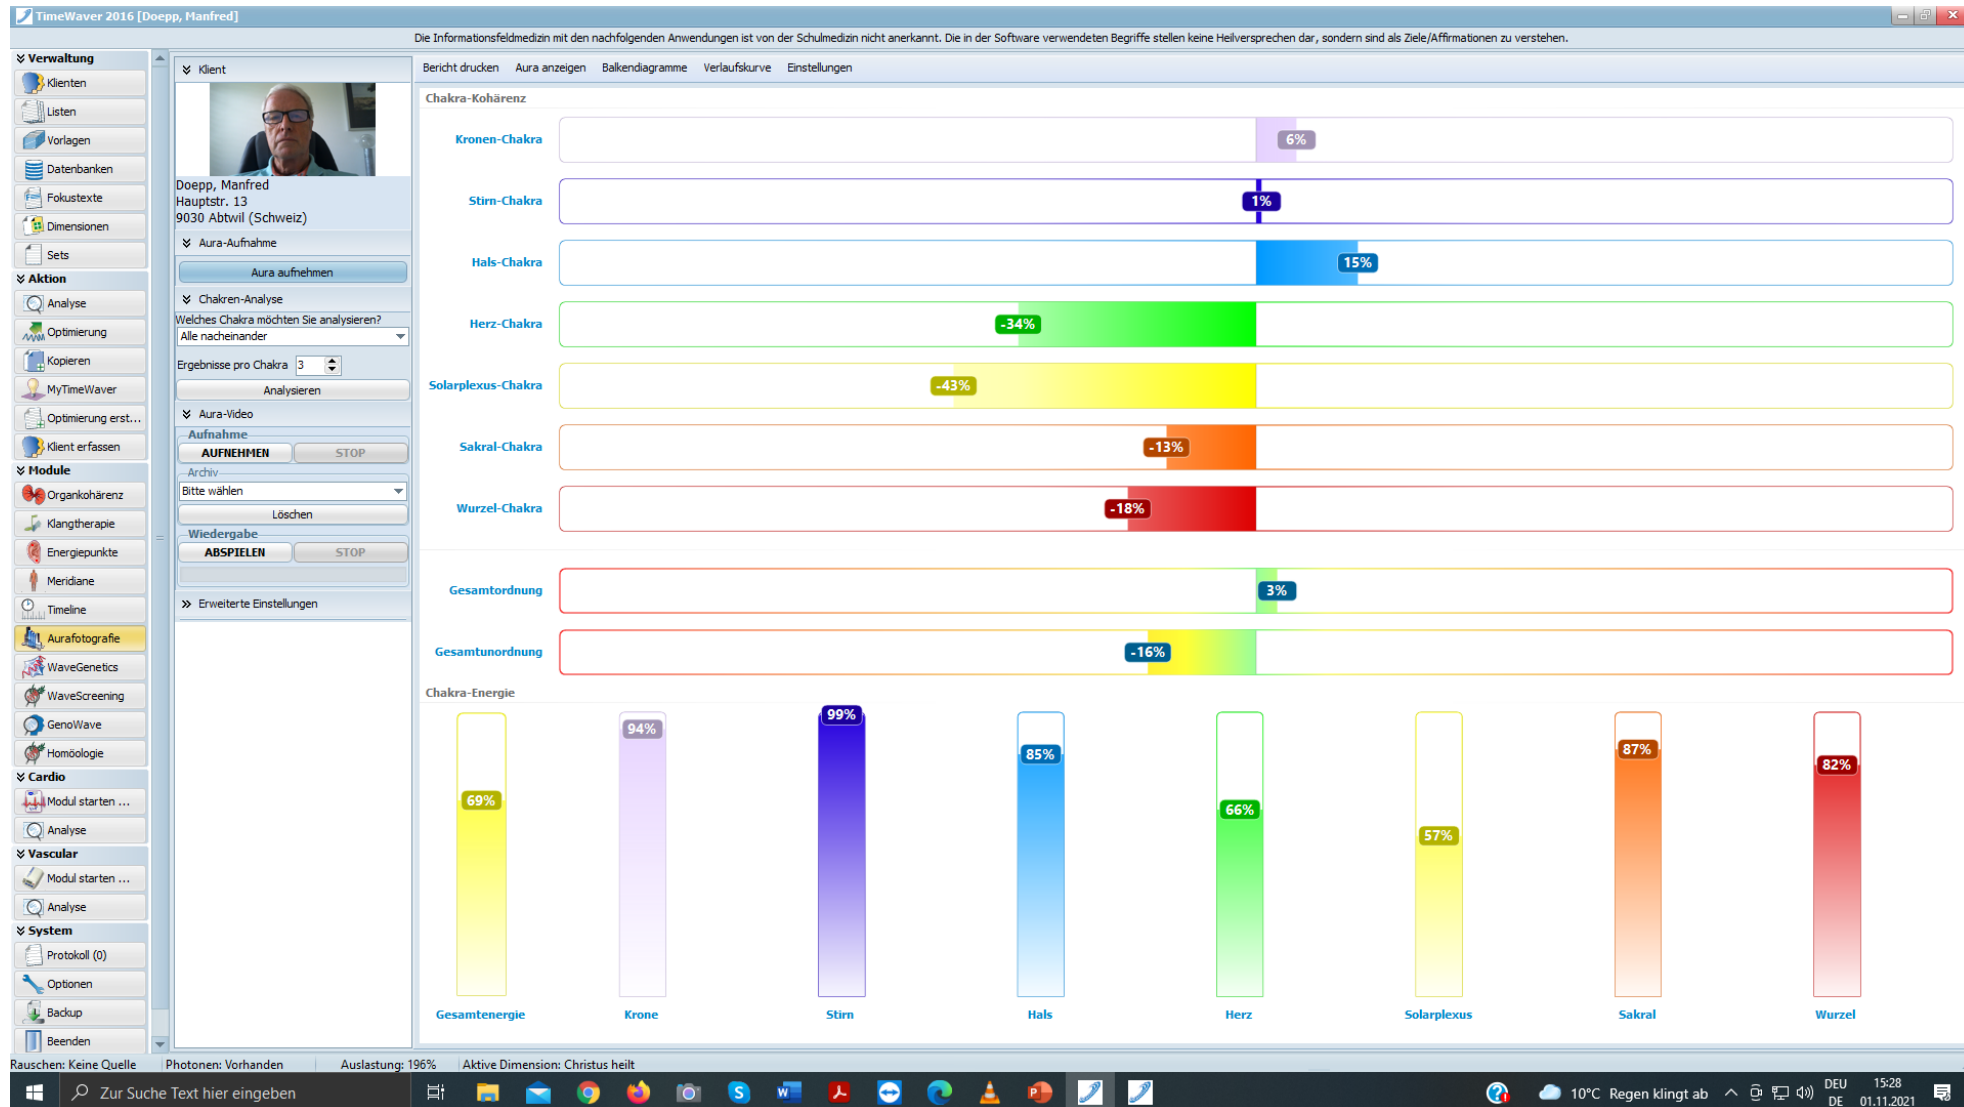

The meridians without enzymes: 4 abnormal, e.g. Triple Warmer

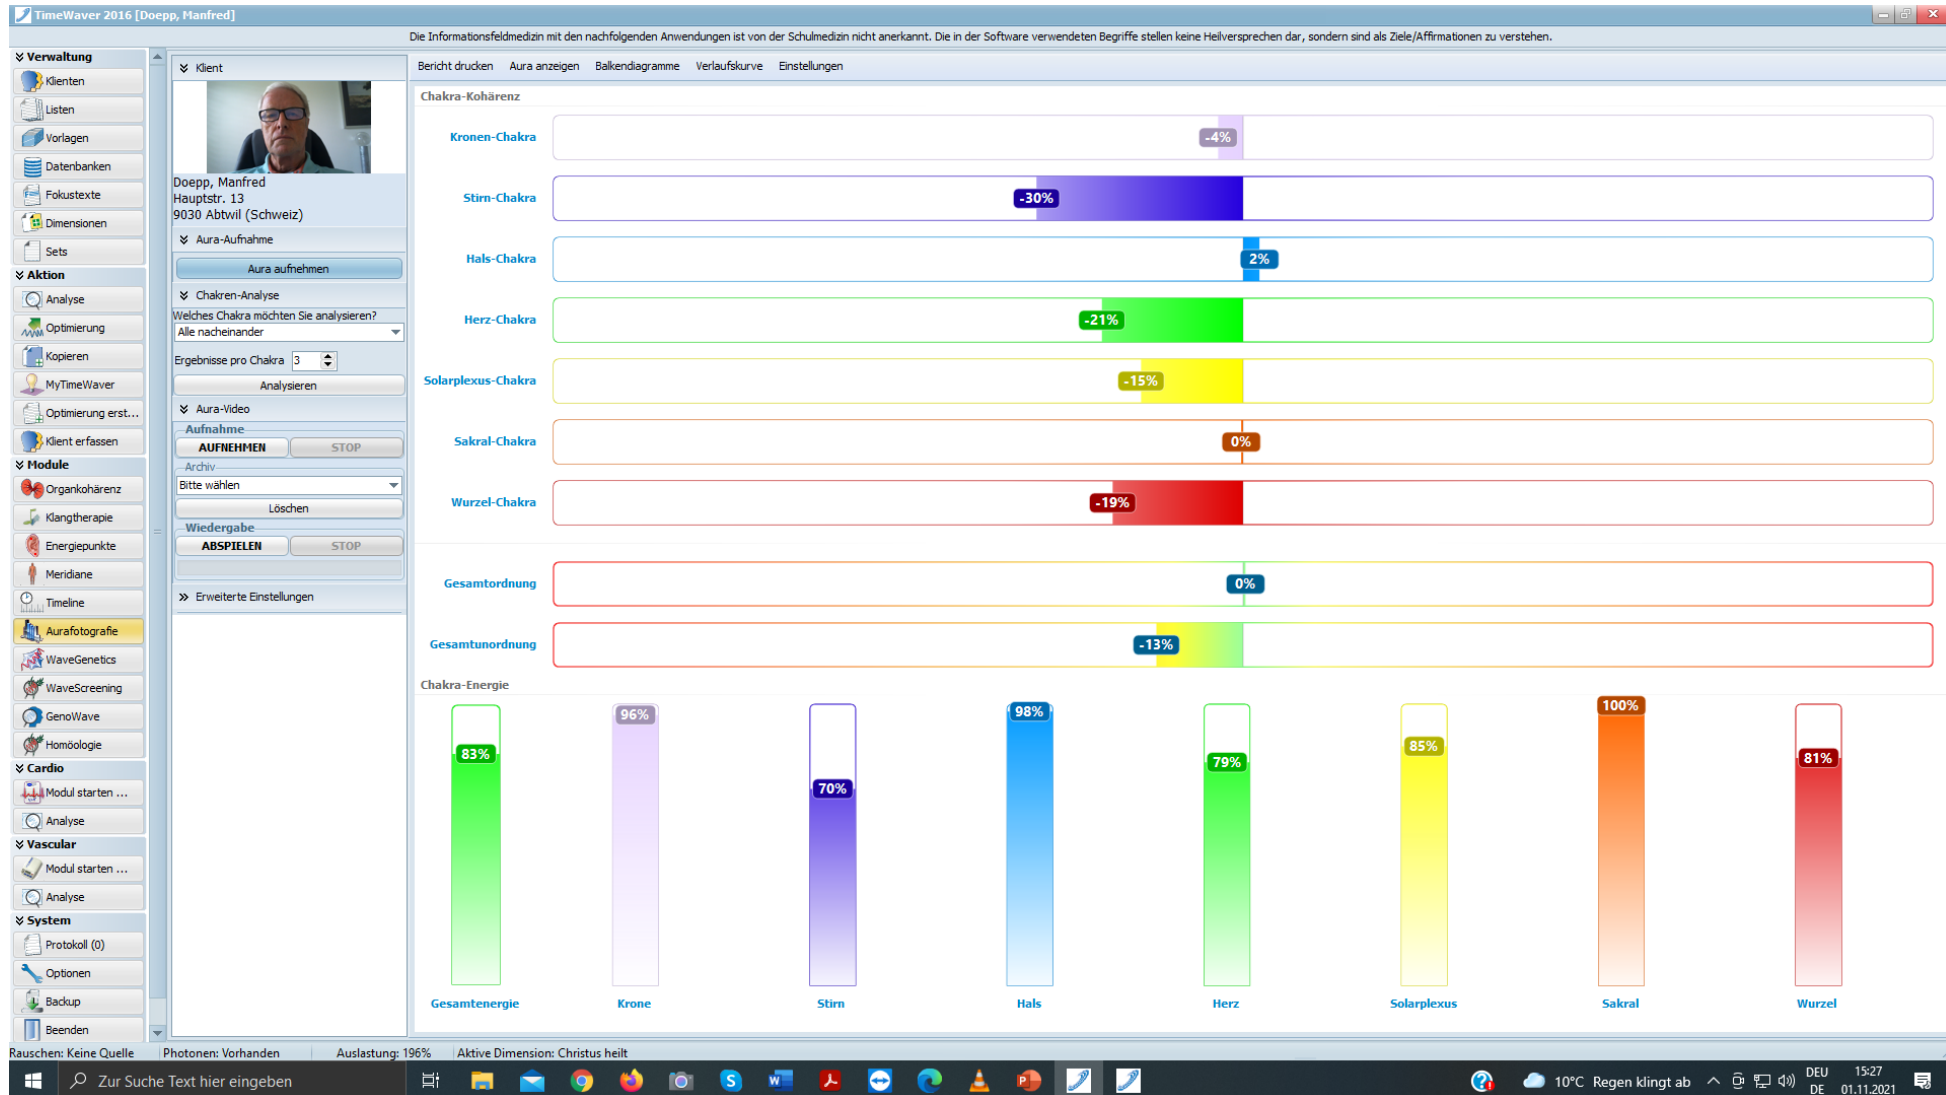

The meridians with enzyme product Citozym: Triple Warmer normalized

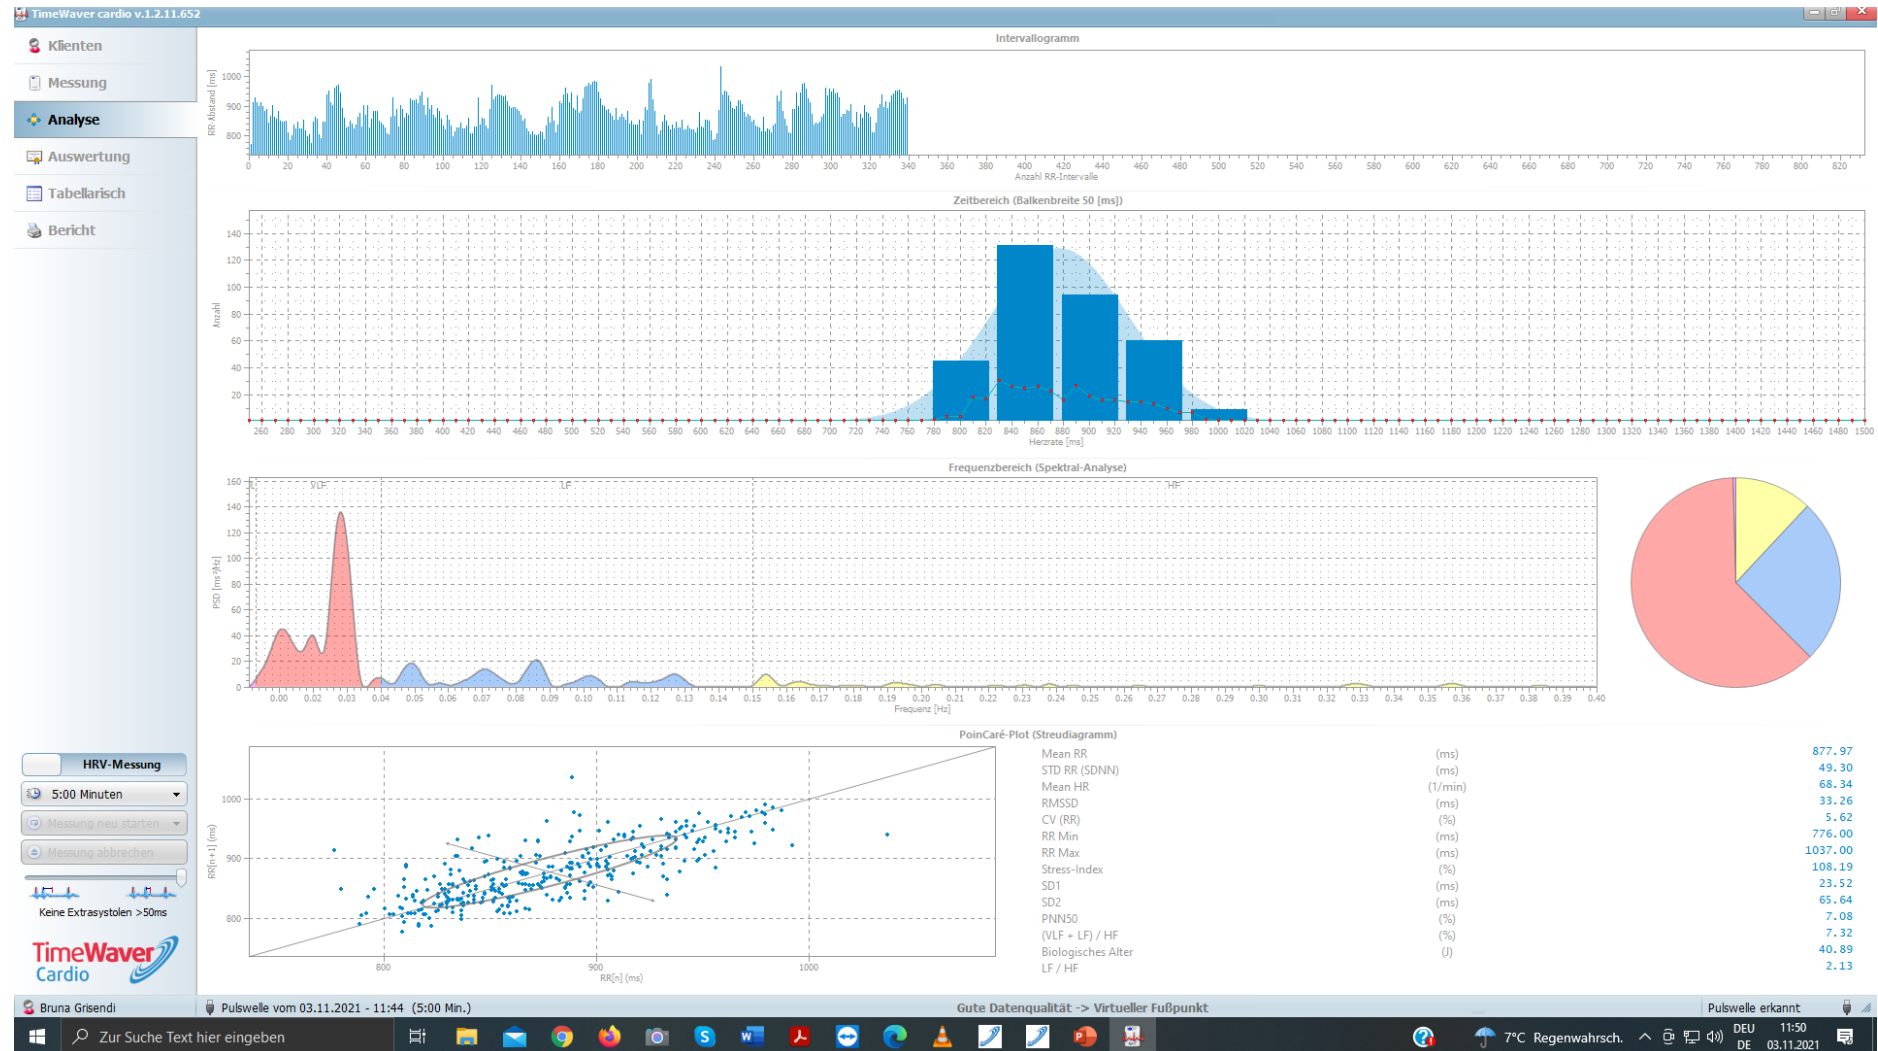

The Aura energy without enzymes: 57 – 99 %, mean = 69 %

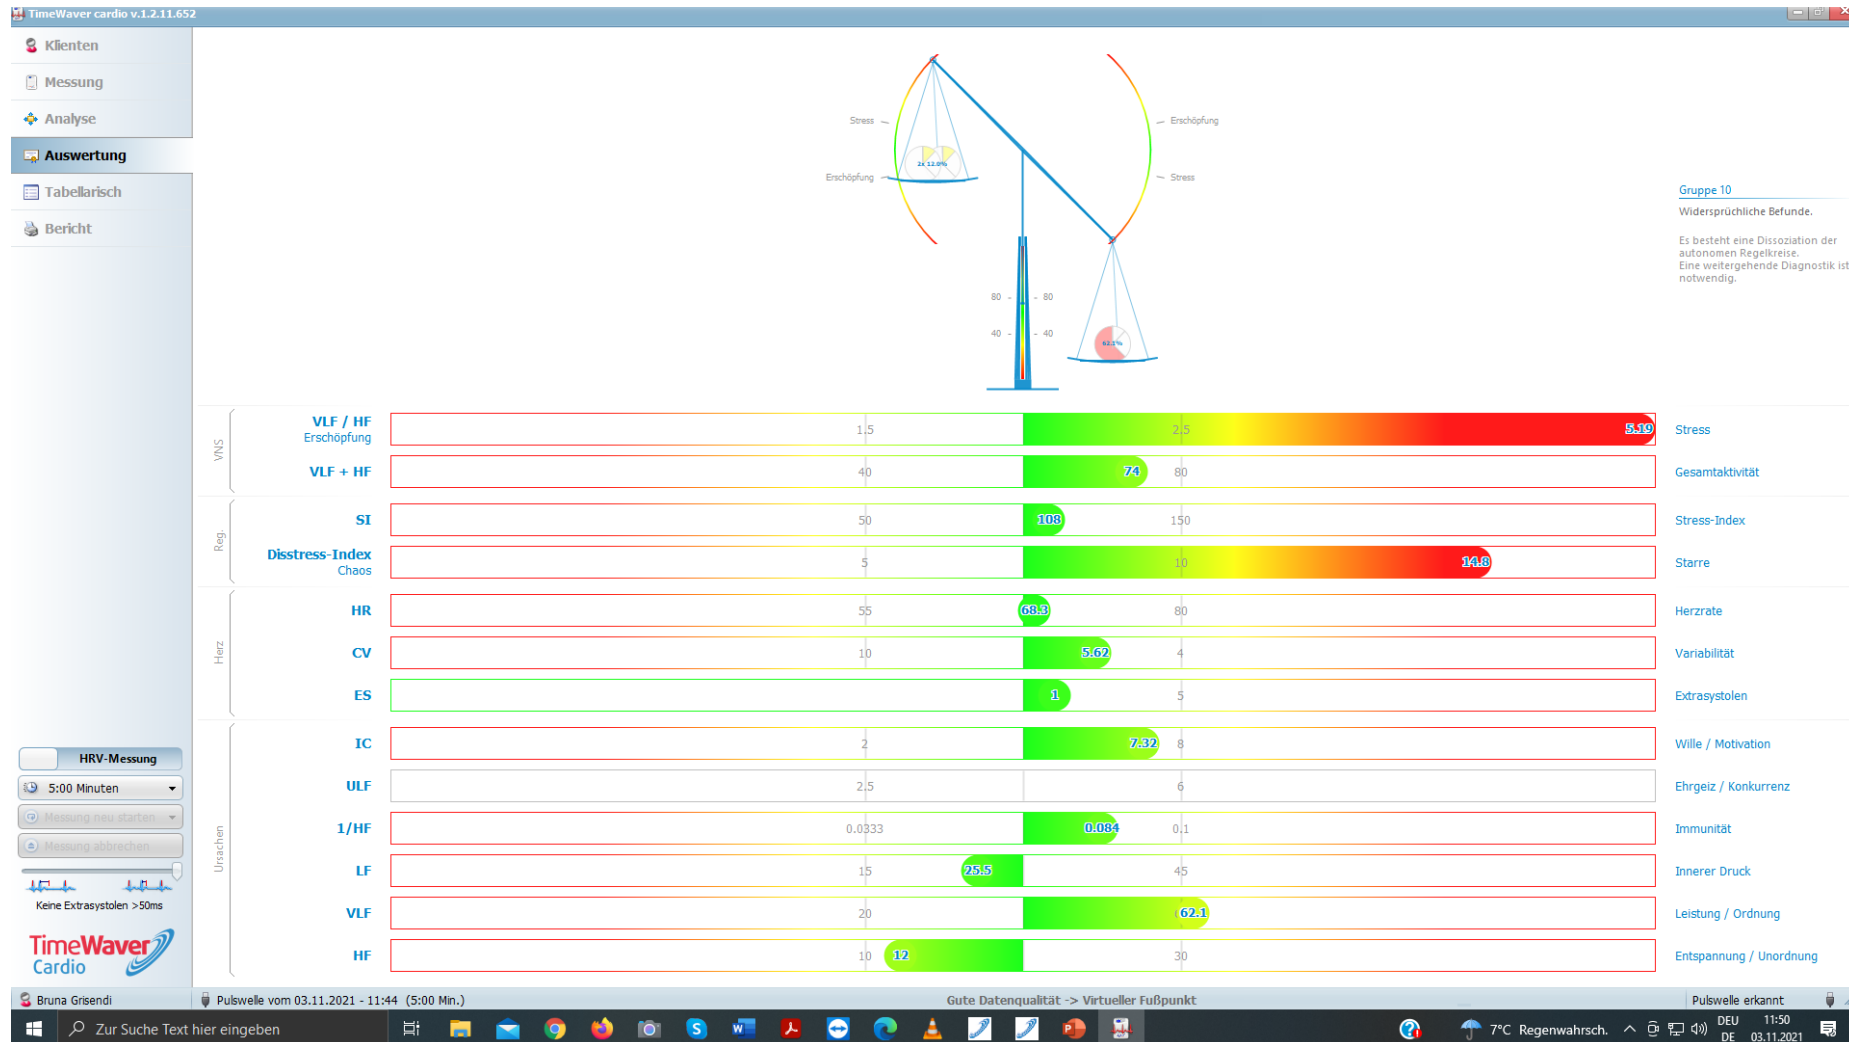

The Aura energy with enzyme product Citexivir: 70 – 100 %, mean = 83 %

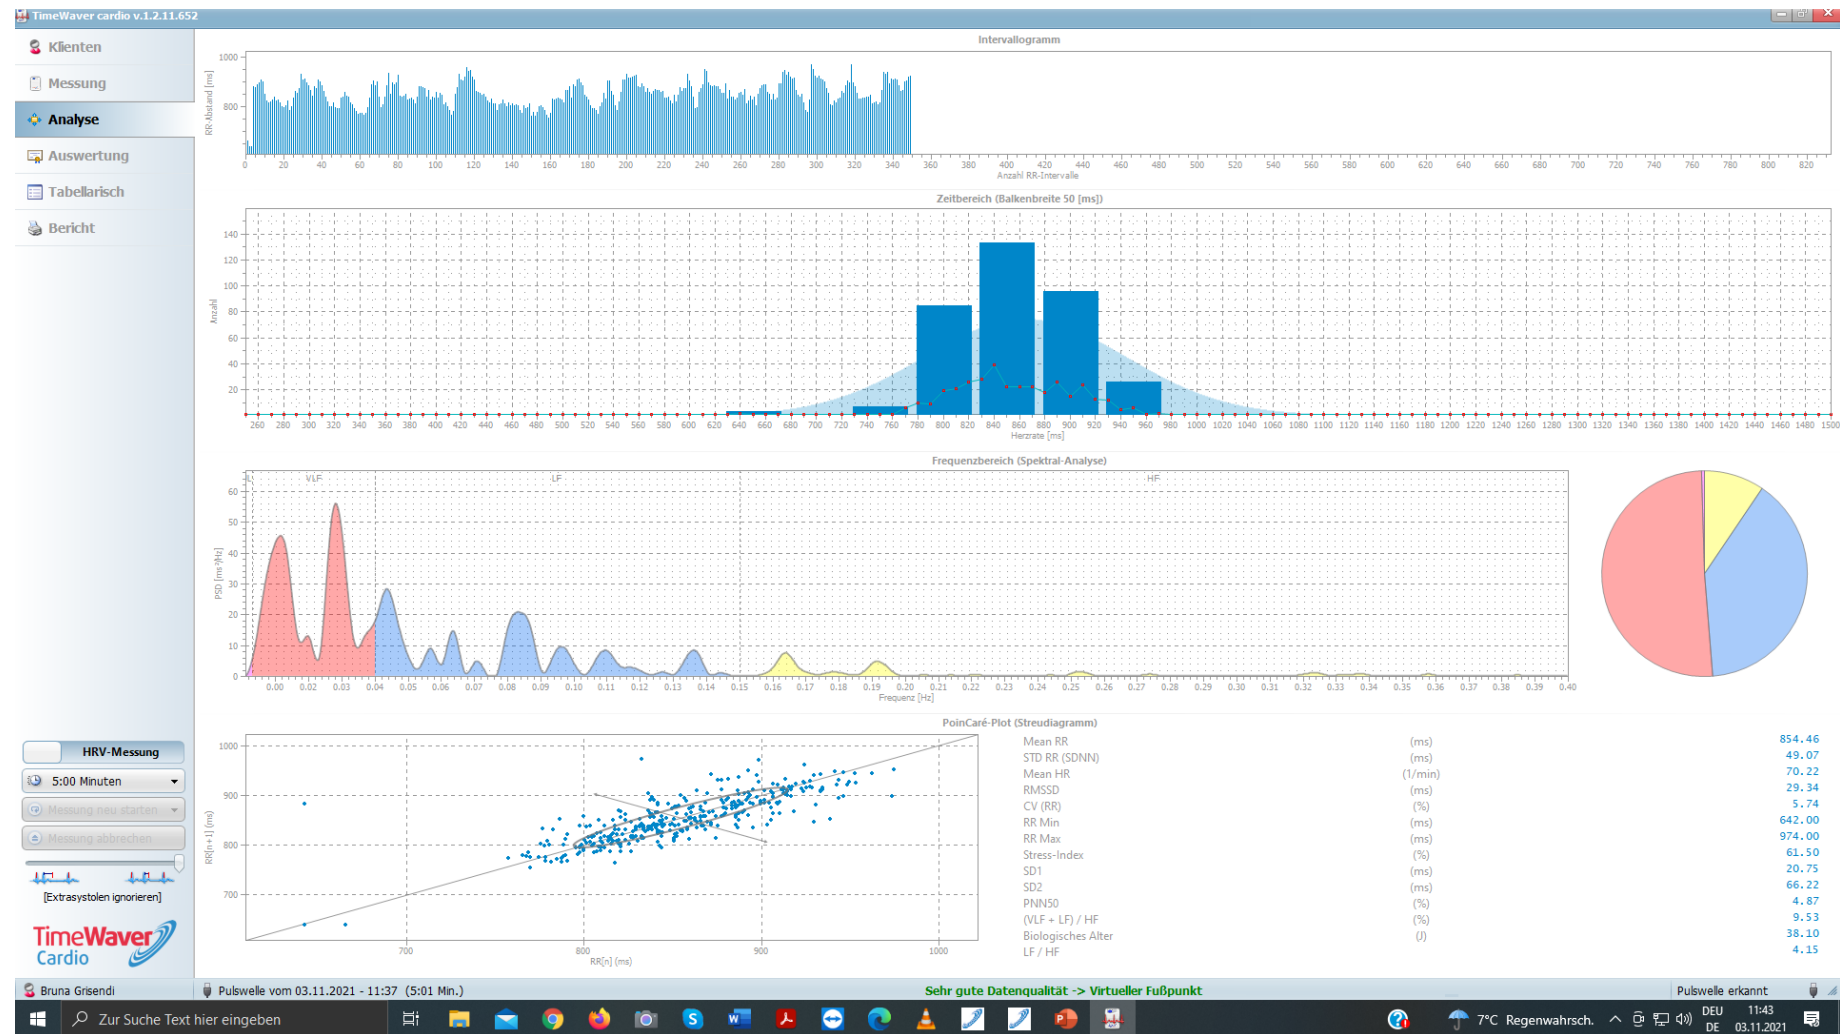

HRV without enzymes: stress result

HRV without enzymes: two stress bars

HRV with product Ergozym plus: less stress

HRV with product Ergozym plus: one stress bar

Conclusions

- Information field diagnostics and therapies are possible.
- Quantum teleportation can be used in medicine.
- Body water (water in the 4. phase) plays an important role.
- Intracellular enzymes are working within the plasma water.
- Those enzymes are available from www.citozeatec.ch – company.
- Pasquale Ferorelli developed more than 350 protocols in order to treat diseases of all kinds.
- We proved their efficiency many times.
