**Dear colleagues !!!**

Dmytro F. Chebotarov Institute of Gerontology of the National Academy of Medical Sciences of Ukraine, together with the Amosov National Institute of Cardiovascular Surgery of the National Academy of Medical Sciences of Ukraine, Romodanov Neurosurgery Institute and the "Association of Cardioneurologists of Ukraine" invites you to take part in the **28th International scientific and practical conference "Actual problems of post-traumatic, vascular and neurodegenerative diseases of the nervous and cardiovascular systems"**, which will be held on November 1-2, 2022. This conference is included into " Register of congresses, congresses, symposia and scientific and practical conferences to be held in 2022" under number 233 (Kyiv, State Institution " Dmytro F. Chebotarov Institute of Gerontology of the National Academy of Medical Sciences of Ukraine ").

This conference is a logical continuation of scientific and practical forums that have been held every year in Ukraine since 1994 with the participation of leading scientists from Germany, France, Azerbaijan, Kazakhstan, Ukraine, etc. All the conferences were held with the active participation of practicing doctors from different states and regions of Ukraine (more than 3,000 delegates). These conferences arouse great interest among scientists and practicing doctors of various specialties, including neurologists, cardiologists, therapists, family doctors, rehabilitation doctors, etc.

The year 2022 is special, both from the side of a complex socio-political and medical situation. During this period, a large number of observations, unresolved medical issues that require collective scientific and practical discussion by medical specialists from various fields and the adoption of adequate complex decisions that are needed today have already been accumulated.

**The main scientific directions of the conference:**

- 1) Brain injury, clinic and modern aspects of its neuropharmacology.
- 2) Cognitive and psychoemotional disorders in cerebrovascular diseases.
- 3) Primary and secondary prevention of cardiovascular diseases.
- 4) Arterial hypertension and problems of hypotensive therapy.

5) Insomnia problems in the background of experienced stress disorder in civilians and military personnel.

6) Multidisciplinary approach to chronic pain problems.

7) Innovative possibilities in the therapy of Parkinson's disease and Alzheimer's disease.

8) Somato-neurological disorders in post-traumatic stress disorder.

9) Problems of psycho-neurological rehabilitation of civilians and military personnel.

10) Neurovirus infection in the pathogenesis of diseases of the nervous system.

11) Postcovid disorders of the nervous system.

Considerable attention will be paid to a comprehensive approach to the diagnosis and treatment of neurological disorders in the rehabilitation period after mine-explosive injuries and sustained psycho-emotional injuries.

The work of the conference is planned to be held online in the form of plenary sessions, symposia, round tables, and master classes. Depending on the political and military situation and quarantine measures, the possibility of holding the event in offline mode is not excluded.

**For additional information, please, contact the organizing committee:** 04114, Ukraine, Kyiv, Vyshhorodska Street, 67, Institute of Gerontology; tel./fax: +38(044) 430-40-27;
